DETAILED ACTION

1. The application filed 12/0/04 has been examined. The preliminary amendment has been entered. Claims 1-18 are pending.

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

3. The IDS filed 12/9/04 has been considered.

4. The drawings are objected to because blocks 1, 6 and 7 must have descriptive legends.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3661

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4-7, 10, 12 and 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Häfner (5,167,385).

A. As per claims 1, 15 and 16, Häfner discloses a method and apparatus for applying braking force to a wheel of an aircraft (Figs. 1a,1b) which estimates conditions at which the wheel would skid taking into account vertical load and applying braking force in dependence thereon (col. 5, lines 45-49; col. 6, lines 17-26).

B. As per claims 2, 4-7, 10 and 12, as above whereby skidding is prevented by taking into account various parameters such as wheel speeds, slippage and vertical force (load). The coefficient of friction is optimally adjusted by applying braking force accordingly (col. 6, lines 17-26).

C. As per claims 17 and 18, as above whereby the braking control apparatus is associated with an aircraft landing gear assembly (Figs. 1a,1b).

7. Claims 3, 8, 9, 11, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited documents are of general interest.

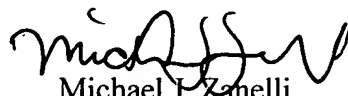

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Zanelli whose telephone number is (571) 272-6969.
